

What partners are saying about MHAP....

I found your presentations [at CORE] substantive and inspiring.

– **World Bank Institute**

We're obviously indebted to CARE's pioneering work [development of the CSC] in this field and would value working together.

-NGO

I loved this session [Social Accountability & Health with CSC presentation] – super informative and provided me with tools that I hope to use in program design and evaluation.

– **CORE meeting participant**

The Ministry supports and would want to see meaningful interaction among community members, health service providers and local partners in health service delivery to identify areas for improving implementation, generate locally applicable innovative solutions, and holding each other mutually accountable for achieving quality of health services in maternal and neonatal health.

– **The Malawi Ministry of Health's Director of Reproductive Health at MHAP Learning Event**

Our partnership [CARE 's & EPGAF's] is very technical and I am sure Ntcheu district will benefit from this partnership .

– **EGPAF in Malawi's Technical Director**
